

Call for Papers
Financial Cryptography and Data Security 2007
February 12-15, 2007
Lowlands, Scarborough, Trinidad and Tobago
<http://fc07.ifca.ai/>

Program Chair: Sven Dietrich, **General Chair:** Rafael Hirschfeld

At its 11th year edition, Financial Cryptography and Data Security (FC'07) is a well established and major international forum for research, advanced development, education, exploration, and debate regarding security in the context of finance and commerce. Original papers, surveys and presentations on all aspects of financial and commerce security are invited. Submissions must have a strong and visible bearing on financial and commerce security issues, but can be interdisciplinary in nature and need not be exclusively concerned with cryptography or security.

Possible topics for submission to the various sessions include, but are not limited to: .

Anonymity and Privacy	Microfinance and Micropayments
Auctions	Monitoring, Management and Operations
Audit and Auditability	Reputation Systems
Authentication and Identification, including Biometrics	RFID-Based and Contactless Payment Systems
Certification and Authorization	Risk Assessment and Management
Commercial Cryptographic Applications	Secure Banking and Financial Web Services
Commercial Transactions and Contracts	Securing Emerging Computational Paradigms
Digital Cash and Payment Systems	Security and Risk Perceptions and Judgments
Digital Incentive and Loyalty Systems	Security Economics
Digital Rights Management	Smart Cards and Secure Tokens
Financial Regulation and Reporting	Trust Management
Fraud Detection	Trustability and Trustworthiness
Game Theoretic Approaches to Security	Underground-Market Economics
Identity Theft, Phishing and Social Engineering	Virtual Economies
Infrastructure Design	Voting system security
Legal and Regulatory Issues
